Equipment info:

All obstacles used meet NADAC specifications.

The trial you are entering is using slatted contacts. For many years slats have NOT been used in NADAC trials. The reasons for this is that with the lowered height of the NADAC A-frame, and the advent of rubber coated equipment, NADAC found that slats became entirely useless in the sport as the dogs had more than enough grip with the rubber coatings. NADAC was the first organization to use rubber contacts, and we feel that the removal of slats was the correct and logical next move. The reason we are allowing slats is to encourage clubs to try NADAC, without having to purchase a specific set of equipment for NADAC and to help struggling clubs who can't afford the NADAC spec contacts. The new generation of slats are not a danger to dogs like the old generation was, so while they are not needed for dogs competing in NADAC, it won't hurt to have them either. It should be noted that any Regional or Championship event that you attend with NADAC will be using non slatted contacts.
