Equipment info:

All obstacles used meet NADAC specifications.

The trial you are entering is using slatted contacts.

For many years slats have NOT been used in
NADAC trials. The reasons for this is that with the
lowered height of the NADAC A-frame and the
advent of rubber coated equipment, NADAC found
that slats became entirely useless in the sport as
the dogs had more than enough grip with the
rubber coatings. NADAC was the first organization
to use rubber contacts and we feel that the
removal of slats was the correct and logical next
move. The reason we are allowing slats is to
encourage clubs to try NADAC, without having to
purchase a specific set of equipment for NADAC
and to help struggling clubs who can't afford the
NADAC spec contacts. The new generation was,
so while they are not needed for dogs competing
in NADAC, it won't hurt to have them either. It
should be noted that any Regional or
Championship event that you attend with NADAC
will be using non slatted contacts.
